SUMMARY

Innovative front-end web developer passionate about developing apps; focused on mobile-first design and development. Currently training at Trilogy coding boot camp to earn a certificate in front-end web development. Adaptable problem-solver, eager to utilise a rich background in mechatronics and bring unique perspectives into building applications. Honed ability to identify and resolve technical issues efficiently and effectively through-out front-end certification program and academic journey. Strong team player with experience in collaborating with web designers and developers to bring projects to fruition.

TECHNICAL SKILLS

Software/Platforms:

GitHub

Bootstrap

Node.js

Software Languages:

HTML

CSS

JavaScript

C#

PROJECTS

Weather Dashboard | GitHub Repository: <https://github.com/Thorbieey/Weather-Dashboard.git> | Deployed Application: <https://thorbieey.github.io/Weather-Dashboard/>

- A responsive web application designed to enable users to check the weather outlook for any city in the world.
- Included a feature to save the user's search history using client local storage and JavaScript.

Password Generator | GitHub Repository: <https://github.com/Thorbieey/Password-Generator.git> | Deployed Application: <https://thorbieey.github.io/Password-Generator>

- A responsive web application that generates a random password based on the user-selected password length and character types.
- Coded the JavaScript responsible for collecting user preferences and generating the password.

ReadMe Generator | GitHub Repository: <https://github.com/Thorbieey/ReadMe-Generator.git> | Walkthrough Video: https://drive.google.com/file/d/1JBpICHCSH-MSnItOu3MTbmKnVFecde2o/view?usp=share_link

- A command-line application that dynamically generates a professional README.md file from a user's input using Node.js and the Inquirer package.
- Built using JavaScript and leverages the power of Node.js to create a seamless user experience.

EXPERIENCE

Quality Assurance Supervisor Lagos Bus Services Limited

2018 – 2020

Lagos, Nigeria

Responsible for effective and prompt implementation of the company's maintenance policies, procedures, and activities. Collaborating with company managers, and technical staff to optimize service quality, maximize productivity, prevent issues affecting service quality, and comply with regulatory demands.

Key Accomplishments:

- Developed and implemented a dynamic performance-based payment structure, which resulted in a 40% reduction in vendor operational costs.
- Introduced over 30 new standard operating procedures and provided training to over 25 supervisory and technical staff members resulting in a 28% increase in vehicle availability.
- Initiated and led an innovative business automation strategy, digitally transforming over 70% of the departmental business processes and increasing efficiency by over 85%.
